Subject: TDS: Gen-Tie Line

Hello Ashley,

Thank you for the call on Friday. We acknowledge and appreciate the Department's concerns that the project did not come in with a defined gen-tie route. We understand that this could cause potential project delays, and we assume full responsibility for any setback associated to the late filing of the gen-tie. Our right of way agent is working on diligently on the appropriate routes, which will be in our next submittal. The identification of an adequate gen-tie route is a critical path item for the project. Once again, we appreciate the concerns and we will work hard to have it completed by the next iteration of the project.

Respectfully,

Patrick Brown | Environmental Permitting Project Manager | Solar Energy Business Unit | Soitec
